

# Gaziantep Environmental and Health Safety Management Plans for Urban Transportation Project

## Detailed description of project

Gaziantep is one of the Greater Municipalities in Turkey with around 1.5 million population. The Municipality had received a loan from EBRD for 50 new low floor compressed natural gas (CNG) buses, a CNG fueling station and maintenance equipment.

The investment aims at integrating the public transport system by providing feeder bus lines to the newly launched light rail transit system. The subject assignment is for:

- Preparation of Environmental health and Safety Management Plan for the Project
- Training of the municipal staff on the plan and health and safety measures.
- Ensuring approval of EBRD for the EHSM Plan.

## Type of services provided

1. Project and Operational Analysis and definition of the environmental, health and safety issues and measures for the project, especially focusing on the mechanical maintenance and repair department.
2. EHSM Plan preparation
3. Training for municipal staff
